ASSR Solution   **Jan 2024 – Feb 2025**
Full Stack Developer(PHP-Laravel Developer)   *Chandigarh, Chandigarh*

- The Auto Parts Sales Management Software is a web-based application designed to manage the sales process for an auto parts business. The software helps streamline the process from lead generation to order creation, confirmation, and delivery to the customer. It ensures better tracking and management of customer orders, enabling the business to handle sales efficiently and improve customer satisfaction.

Projects

Samarthya Nursing-Teaching Platform | *Laravel Framework, PHP, MySql, Javascript*   **August 2023 - Sept 2023**

- Students can purchase and access courses directly within Samarthya Nursing, a dynamic e-learning platform. It operates as a dynamic content management system (CMS) for services, blogs, and courses. Users may easily enroll in and pay for courses thanks to the platform's integration of a payment gateway for smooth transactions.

PragatiTrust-Loan Providing Software | *Laravel Framework, PHP, MySql, Javascript*   **May 2023 - August 2023**

- A loan management tool called PragatiTrust offers adjustable loan terms with options for payback in terms of days or months. Numerous loan-related computations are managed by the system, including EMI schedules and complex financial reporting including loan summaries, recovery tracking, and disbursement. In order to ensure smooth loan processing and data administration, I also oversaw the integration and development of all APIs within the program.

BankConsultancy | *Laravel Framework, PHP, MySql, Javascript*   **April 2023 - May 2023**

- An extensive website with a focus on EMI-based loan estimates is called Bank Consultancy. Users are able to input loan details and view the EMI amounts, interest rates, and periods of repayment instantaneously. The software provides customers with clear insights into their financial obligations by allowing them to perform reverse calculations to see how their EMI payments will affect the overall loan amount and interest over time.

ElObsique Gift Purchasing E-Commerce Websites | *Laravel, PHP, MySql*   **March 2023 - April 2023**
- This website allows the user to purchase any gift product which is an e-commerce website with a dynamic basis.

Real-Estates Property Selling and Buying Websites | *Laravel, PHP, MySql*   **March 2023**
- Developed a real-state website that allows the user to create an account and sell or buy any property they want. This website is a dynamic website where admins can also post their property and sell them.

ParamComputers —— Ecommerce Website | *Laravel, PHP, MySql*   **December 2022**
- Developed a fully dynamic e-commerce website where administrators can easily add and manage their own products for sale. Integrated PhonePay payment gateways to facilitate secure transactions and created all necessary APIs to support product management, order processing, and payment functionalities. The solution ensures a seamless user experience and robust back-end support for online sales operations.
- Allows to purchase all hardware parts.

LocalGarden —— Local Vendoring Ecommerce Website | *Angular, Typescript, NodeJS, MongoDB* **September 2022**
- The LocalGarden eCommerce website is a platform built using React for the front end and Node.js for the back end. Designed specifically for local vendors, the website enables them to sell fresh vegetables and fruits directly to consumers in their area. The platform's primary objective is to support local vendors in managing their business and reaching customers easily.
- Vendor and Customer Interfaces: Vendors can register, manage their inventory, update product details, and handle orders, while customers can browse products, view detailed descriptions, and place orders.
- Real-Time Notifications: Vendors receive real-time notifications on their mobile devices whenever they receive an order, allowing them to manage deliveries efficiently.
- Self-Delivery Option: Vendors have the option to fulfill orders and deliver products themselves, giving them full control over the delivery process and improving their customer relationship.

THINKGOVTJOBS | *PHP, WORDPRESS*   **February 2022**
- ThinkGovtJobs is a blogging platform built with React.js, Node.js, and MongoDB that provides up-to-date information about government jobs, exam schedules, results, and the latest government news. The website is designed to serve as a one-stop destination for users seeking reliable updates about various government opportunities and notices.
